ARCHITECTURAL CONCEALMENT SYSTEMS

Strongwell offers a broad range of FRP (fiber reinforced polymer) structural materials, systems and fabricated structures. Strongwell's fiberglass products are ideal solutions for architectural concealments, as they are attractive, easy to install, lightweight and transparent to cellular emissions and radio waves.

Conceal:

- Antennas
- Transmission Equipment
- Satellite Dishes
- HVAC Equipment

Cellular Shielding
Santa Ana, CA - Installed 1998

- Lightweight materials - no need to reinforce support systems or roof
- Designed to match existing facade
- Upgrade Visual Aesthetics
- Improve Sight Lines
- Increase Rental Income

Fiberglass Spire
Atlanta, GA - Installed 1991

Fiberglass Turrets
Orlando, FL - Installed 1988

BENEFITS OF FRP

WON'T RUST, ROT OR CORRODE

EASY TO INSTALL

VIRTUALLY MAINTENANCE FREE

IMPACT RESISTANT

LIGHTWEIGHT

STRONG

TRANSPARENT TO CELLULAR EMISSIONS

LOW ELECTRICAL & THERMAL CONDUCTIVITY

Fall 2012

Case Study: EXTREN® and DURASHIELD® Stone Mountain 16+ Years Later, Still "Tops" Expectations

Over sixteen years ago EXTREN® fiberglass structural shapes, DURASHIELD® building panels and FIBREBOLT® fiberglass studs and nuts were installed as part of a 53' square roof atop the Aerial Tram Station on Stone Mountain, Georgia. The structure also houses and conceals twenty antennae. Today, the structure continues to show the excellent return on investment for its current owners. It continues to meet structural requirements, remains invisible to radio frequencies and maintains its aesthetic beauty to complement the park atmosphere.

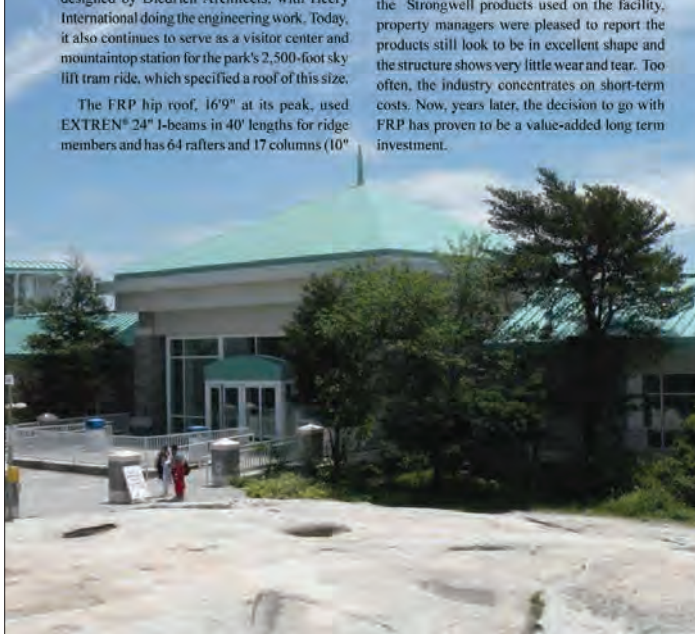

The fiber reinforced polymer (FRP) structure was created for the 1996 Olympics and was designed by Diedrich Architects, with Heery International doing the engineering work. Today, it also continues to serve as a visitor center and mountaintop station for the park's 2,500-foot sky lift tram ride, which specified a roof of this size.

The FRP hip roof, 16'9" at its peak, used EXTREN® 24" I-beams in 40' lengths for ridge members and has 64 rafters and 17 columns (10"

and 12" EXTREN® FRP wide flange beams), and 130 hand lay-up, 1/2" thick connection plates. The fiberglass structure was covered with 3,400 lineal feet of 1" DURASHIELD® FRP building panels. FIBREBOLT® FRP fasteners were used to bolt through the DURASHIELD® panels through top and bottom flanges of the rafters. Strongwell was able to prefabricate and partially assemble the project before shipping to the site.

FRP has always been known for excellent durability and the 16+ years of exposure on Stone Mountain has had little to no effect on the product.

When asked recently about the lifespan of the Strongwell products used on the facility, property managers were pleased to report the products still look to be in excellent shape and the structure shows very little wear and tear. Too often, the industry concentrates on short-term costs. Now, years later, the decision to go with FRP has proven to be a value-added long term investment.

INSIDE:

- *FRP Wins Against High Commodity Prices*
- *Strengths to Weight Ratio Leads to Savings on Installation, Maintenance and Operation Costs*
- *Pultruded FRP Offers a Low Maintenance Alternative to Metals in Pool Environments*
- *FRP Inserted into Award Winning Art Deco Museum Entrance*
- *New SAFRIL™ Components*
- *Literature Updates*
- *New Faces at Strongwell*

Winter 2011

Case Study: EXTREN® and DURADEK® Pipex px® Introduces the Cocoon Subsea System

Cocoon and Shroud™ subsea protection systems are designed and manufactured by UK-based Composite Solutions, a Pipex px® company. The systems are designed to protect subsea oilfield flowbases from the marine environment, objects dropped during drilling, or fishing trawler net incidences. Both the Cocoon and Shroud™ use Strongwell components including 8" (203mm) EXTREN DWB® (all glass), EXTREN® series 625 profiles and plate, and DURADEK® 1-6000 1-1/2" (38mm) grating.

The Cocoon utilizes a unique skeletal "clam" design with an external surface using lightweight FRP (fiberglass reinforced polymer) materials, ensuring that fishing gear is either safely deflected or easily retrieved. The Shroud element located at the base of the Cocoon allows simple offshore deployment and installation to well heads. The first Cocoon was installed ten years ago and now, there are over 23 in the North Sea.

It was an easy decision to use Strongwell materials due to the weight reduction, corrosion resistance, and ability to withstand impact. Strongwell's vinyl ester products were chosen for enhanced performance in harsh subsea conditions (100m/650 ft. depth+). ●

LIV DETWILER

EDUCATOR, MOTHER, NEIGHBOR, LEADER

FOCUS AREAS:

Approach with care the potential acquisition of Sullivan North High School, and consider alternative options. This potential re-shuffling of schools will have significant impact on families, transportation, school communities, and the overall facilities budget. Change must be done transparently and strategically so to keep families involved and informed.

Find educational models that fit a variety of students' needs. Prepared graduates lead to better success and viability of the broader Kingsport community.

Create a long-term funding plan to improve upon and maintain school properties. Well-maintained spaces for the community to enjoy are a source of pride. It is the BOE's duty to do their best to actively level the playing field for all Kingsport students.

Strengthen school safety. Any child that does not feel safe, in every sense of the word, will not progress in their learning.

Support social and emotional learning. These skills are essential to being successful in today's high-pressure society.

ABOUT YOUR HOSTS

Our mission, as an online tavern, is to share fresh beer news, cool beer-related products, tasting and interviews with passionate people in and around beer. All you have to do is sit back and enjoy the ride.

KYLE DAVIS

FIRSTLY, KYLE LOVES LIVING A GREAT BEER LIFESTYLE. KYLE BELIEVES THAT BEERS HELP CREATE LITTLE TIME CAPSULES OF FRIENDLY MOMENTS AND HELP POLISH OVER THE HARD EDGES OF A CRUDDY DAY. BEERS FORTIFY AND IMPROVE OUR CIVILIZATION. HE HAS BEEN KNOW TO SHOW UP PACKING COLD BOMBERS TO PLACES THAT DO NOT ALLOW SAID BOMBER THERE WITHIN. HE WAS NOT DISDAISED. HIS FAVORITE STYLES INCLUDE BELGIAN GOLDEN ALE, PALE ALE, INDIA PALE ALES AND RUSSIAN IMPERIAL STOUTS. LET IT BE SAID THAT KYLE IS NO BEER SNOB AND WILL HAPPILY QUAFF CANS OF DOMESTIC LAGERS WITHOUT QUESTION. THE COLDER THE BETTER. CHEERS!

KELLY BARNETTE

KELLY STARTED HIS LOVE FOR CRAFT BEER LATER IN LIFE. HE KNEW THAT THERE WAS MORE LIFE TO BEER THAN JUST PLAIN YELLOW BEER BUT HE HAD NO DIRECTION DUE TO GROWING UP IN A 'DRY' CITY IN ALABAMA. AFTER MOVING TO THE EAST TENNESSEE REGION, HE FOUND HIS FIRST BEER HE THOUGHT WAS MUCH DIFFERENT. AN OATMEAL STOUT FROM HIGHLAND'S BREWING COMPANY OUT OF ASHEVILLE, NC. IT WAS AMAZING. COLD AND ON TAP. FROM THAT POINT ON, HE MADE IT HIS MISSION TO TRY AS MANY BEERS AS HE COULD. WITHIN REASON. JUST RECENTLY, WITH SOME MENTORING FROM CLOSE FRIENDS, KELLY STARTED PLANNING FOR THE HOMEBREW EXPERIENCE. HOLD ONTO YOUR HATS, PEOPLE. IT'S GONNA BE A BUMPY AND AMAZING RIDE.
